Curriculum Intent

At Wickersley Partnership Trust we understand that getting the curriculum right for each and every individual student is the single most important factor in ensuring progress, encouraging positive engagement and raising aspirations.

We want all students to leave able and qualified to play their full part in an ever-changing world through an ambitious, creative and innovative curriculum, which empowers students with the skills, knowledge and attributes to allow them to succeed in their next phase of education and their working life.

The Geography curriculum is designed to develop curiosity about the world and its people to unlock the key to their future.

Year 13 Curriculum

At A-Level Geography, students study both Human and Physical Geography in depth, focusing on 3 individual topics for each. Students will also undertake an NEA, which contributes 20% of their marks. This is an independent investigation, in which students will undertake research in a Geographical area of their choice.

Human Geography:

Global Systems and Governance

This section of our specification focuses on globalisation – the economic, political and social changes associated with technological and other driving forces which have been a key feature of global economy and society in recent decades.

Changing Places

This section of our specification focuses on people's engagement with places, their experience of them and the qualities they ascribe to them, all of which are of fundamental importance in their lives.

Resource Security

This section of the specification focuses on the large-scale exploitation of unevenly distributed natural resources, which is one of the defining features of the present era.

Physical Geography:

Water and Carbon Cycles

This section of our specification focuses on the major stores of water and carbon at or near the Earth's surface and the dynamic cyclical relationships associated with them. These are major elements in the natural environment and understanding them is fundamental to many aspects of physical geography.

Hazards

This section of our specification focuses on the lithosphere and the atmosphere, which intermittently but regularly present natural hazards to human populations, often in dramatic and sometimes catastrophic fashion. By exploring the origin and nature of these hazards and the various ways in which people respond to them, students are able to engage with many dimensions of the relationships between people and the environments they occupy.

Coastal Systems and Landscapes

This section of our specification focuses on coastal zones, which are dynamic environments in which landscapes develop by the interaction of winds, waves, currents and terrestrial and marine sediments.

Assessment Points

Students are assessed at the end of each topic. Paper exams are taken between May/June, covering all content they have studied at A-Level.

Immerse Yourself

BBC Geography News

-  Current Geography Events
-  Real World Issues
-  Human and Physical Geography Articles

Seneca A level Geography Revision

-  Get Revising Quicker!
-  Variety of Topics
-  Study Support and Revision

All students share lessons via the Google Classroom and are expected to maintain a detailed notes folder, so students are directed towards each lesson to ensure their notes are in order.

Students are assigned regular exam question homework to apply their lesson knowledge to exam-based scenarios.

Students share reading with real world issues relating to the topics that they have studied, in which students are expected to engage in these in independent study times.

Test Your Knowledge with Quizlet...

Quizlet's Y13 Geography flashcards are a fantastic way to memorise relevant Geography terms to help you with your studies. Click on the icon below to start!

Praise and Reward

Our rewards system can be broadly split into four categories: classroom level, subject level, school level and privilege rewards. We'll focus on classroom and subject rewards here - for more information about our rewards schemes, please see our website.

CLASSROOM LEVEL REWARDS

Awarded for: working hard, taking risks and rising to a challenge, making mistakes and learning from them, helping others, and taking pride in the school community.

Rewarded by: praise postcards, positive phone calls to parents/carers, positive text messages home, and lesson based prizes.

SUBJECT LEVEL REWARDS

Reward scheme: Star of the Week, Curriculum Awards (Subject/School Way, Participation, Working with Pride, Embracing the Whole Curriculum), High Flyer, Extra Mile, Most Improved.

Rewarded by: names displayed on reward boards, certificates, social media posts.

Broadening Horizons

Our intent is that all students have a full understanding of how to develop themselves as well rounded citizens, maintain healthy relationships and understand how to keep themselves safe both online and in their day-to-day life. We want all students to know what options are open to them in the future and understand the routes they have in order to progress on their life journey.

- At the start of the year Year 13, students conducted various field work visits to gain a better understanding of how to carry out a geographical investigation. The knowledge and skills they gathered on these visits will help them to complete their Geographical Controlled Assessment.
- Wider opportunities through residential, Camps International, charitable work and our Duke of Edinburgh provision

University of Sheffield - Geography Society

GeogSoc runs lots of exciting charity fundraisers such as 10k runs and half-marathons, pub quizzes and auctions. This year, alongside Cathedral Archer Project they will be supporting a Sheffield based environmental charity for the first time. Click on the logo for more information.

What is Physical Geography?

Traditionally, Geography is studied as two interconnected parts: Physical Geography and Human Geography. Crash Course Geography discuss Physical Geography in this YouTube short. Click on the logo to watch the video.

Careers

We run a series of 'Careers in the Curriculum' weeks in our school. For Geography, this week takes place in May.

Students take part in activities to encourage them to think about how what they learn in the classroom can be applied in a number of future careers.

One option Y13 have discussed is opportunities via the Royal Geographical Society, one of these being apprenticeships. These are a great opportunity to gain practical skills in the workplace whilst studying at the same time. Most of your time is spent doing on-the-job training, and the rest is spent working towards a qualification. Click on the logo below for more information!

The Geography Way

The Geography Way is followed and referred to in all lessons. The Geography Way has two main purposes. Firstly, to teach students the vital skills they need to achieve their full potential and gain the very best grades they can. Secondly, to teach students how each subject relates to the wider world, incorporating the life skills they will learn.

THE GEOGRAPHY WAY

WE EXPLAIN OUR REASONS USING CONNECTIVES
We explain both sides of the geographical argument when asked to

WE USE OUR OWN EXPERIENCES OF THE WORLD
We consider our global responsibilities

WE ANALYSE & interpret data & graphs to the BEST of our ability
We always make links to the question
We use diagrams & data to help with our learning
We learn & use geography key terms

WE USE MAPS & refer to locations
We use real world examples
We complete fieldwork safely & accurately

SUBJECT WAYS
